Breathable high quality Fabric

Premium quality imported knitted fabric with latest quilting on computerised CNC machines. The fabric is breathable & soothing to the soft pores of our skin

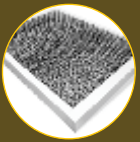

High Density Support Foam

The foam being the top most layer is covered by a fabric which is soft & also help in keeping away bacteria, fungus, etc

Bonnell Spring

We use premium quality high tensile strength, giving resilience & recoil. Our Spring Mattress are made of the finest quality material and high carbonized steel spring wires.

Re-Inforced Border Foam Edges

Re-inforcing the Steel Rhomboid on the edge with a thick HD foam is an innovative process from the house of SPEY MATTRESSES, it protects you're inner things from the hard steel alloys and it gives increased sleeping surface.

Felt

We use the best thermo bonded felt that ensures you the best comfort and long lasting life of your mattress. This layer dampens the sound and gives you undisturbed sleeping surface. We call it "MAMMOTH".

Air Button

We use premium quality Air-Button that provides a channel for air to pass & mattress to breathe, this increases the life expectancy of the mattress.

POCKET SPRING MATTRESS

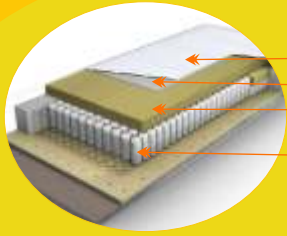

Pocket Spring Mattress

Pocket Spring mattress, across the world, are now synonymous with luxury. Higher number of springs are placed in the mattress, which provides better support. They have smaller diameter springs and thinner diameter wire than other mattress.

High Density Support Foam

The foam being the top most layer is covered by a fabric which is soft & also help in keeping away bacteria, fungus, etc

Soft Support Foam

The foam being the top most layer is covered by a fabric which is soft & also help in keeping away bacteria, fungus, etc

Re-Inforced Border Foam Edges

Re-inforcing the Steel Rhomboid on the edge with a thick HD foam is an innovative process from the house of SPEY MATTRESSES, it protects your inner things from the hard steel alloys and it gives increased sleeping surface.

Pocket Spring

Each spring in a pocket spring mattress works separately, to give a 'none roll together' mattress, with individual support, for each user

Zero Partner Disturbance

Each spring is placed in its own calico pocket, which means it is completely unattached from its neighbor.

EURO TOP MATTRESS

Euro top mattresses, build with an additional layer of padding into the mattresses instead of sewing it onto the top as a separate piece

A luxury Euro top gently contours to you body and automatically adjusts to the different pressure points of the body, this allow you to the fully supported during sleep and provides you with maximum comfort.

It last much longer than traditional mattresses as they return to their proper shape after each night's rest

Because of the calming and pleasant sleeping experience that people get from euro Top mattresses, these mattresses are increasingly popular.

MEMORY FOAM MATTRESS

Memory Foam with Pocket Spring

Memory Foam with Bonnell Spring

Memory Foam with Bonded Foam

Memory foam was first invented by NASA, commonly known as visco Elastic Foam.

At room temperature memory foam is rigid, but when in contact with heat generated by the body, molds itself to the exact body shape.

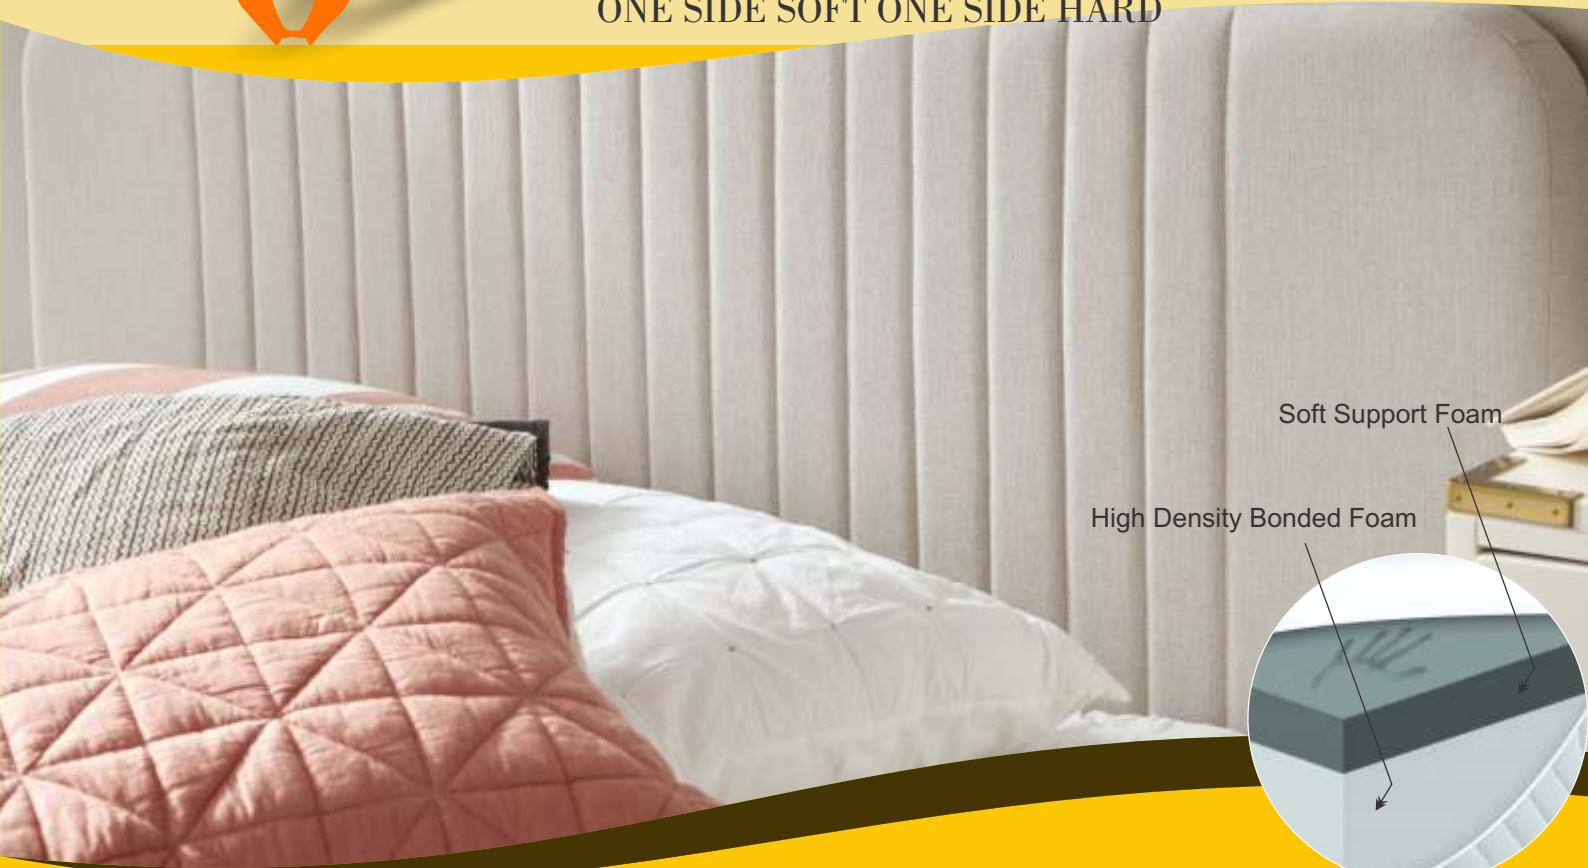

Memory foam is favoured for its luxurious feel, exceptional support, and moulding properties, and is a popular filling for mattresses and bedding.

It distributes pressure across the entire surface of the mattress and as a result relieves pressure and helps align the spine during sleep.
